ABOUT ME

Motivated data enthusiast with a strong grasp of Python, SQL, Machine Learning, and RAG-based AI systems. Adept at extracting meaningful patterns from complex datasets and building end-to-end analytical pipelines. Seeking an opportunity to apply technical skills and a problem-solving mindset to real-world data challenges.

TECHNICAL SKILLS

Programming Languages : Python, Java, SQL
Libraries : Pandas, NumPy, Matplotlib, Scikit-learn
Tools : Excel, Power BI, Git, GitHub
Web Technologies : HTML, CSS, JavaScript
Concepts : OOP, DBMS, Data Structures
AI / ML : Machine Learning, RAG (Retrieval-Augmented Generation)

PROJECTS

E-Commerce Sales Dashboard — Olist Brazil

- Analyzed 100K+ orders across 9 tables using Python & SQL — performed EDA, wrote 16 queries with window functions (LAG, RANK, CTEs), and uncovered key insights including São Paulo driving 42% of revenue and 8.1% late delivery rate
- Segmented 95K customers using RFM analysis + K-Means clustering (K=4) into Champions, Loyal, At-Risk and Lost groups delivered 6 targeted business recommendations
- Built 4-page Power BI dashboard with DAX measures & slicers + forecasted 3-month revenue using Facebook Prophet with 95% confidence intervals
- Github Link: <https://github.com/Krishna-Dhawangale/E-Commerce-Sales-Dashboard-by-Olist>

Customer Churn Prediction & Analysis

- Analyzed ~7K telecom records; performed preprocessing, feature engineering, and EDA
- Identified key churn drivers: new users (47%), month-to-month contracts (43%), fiber services (42%)
- Built ML models (Logistic Regression, Decision Tree, Random Forest) with ~85% accuracy, optimizing recall for at-risk detection
- Developed a churn playbook and interactive Power BI dashboard for actionable insights and decision-making
- Github link: <https://github.com/Krishna-Dhawangale/Customer-Churn-Prediction>

Multi-Agent RAG Compliance Auditor

- Built an end-to-end compliance auditing system that ingests regulatory PDFs, chunks and embeds them into a Qdrant vector database, and runs a 3-agent CrewAI pipeline to flag violations, assess legal risk, and compile a structured report with a 0–100 compliance score.
- Implemented RAG retrieval using sentence-transformers to semantically search relevant regulatory rules per document passage, reducing irrelevant context passed to agents by ~80% vs full-document prompting.
- Deployed a Streamlit interface enabling non-technical users to upload any PDF and receive a color-coded violation table, executive summary, and downloadable JSON audit report in under 2 minutes.

EDUCATION

S. B. Jain Institute of Technology Management and Research, Nagpur	
B.Tech — Computer Science Engineering Aug 2023 – June 2027 (Expected)	CGPA: 8.28
Higher Secondary (12th Std-Science) Bhalerao Jr. College of Science, Saoner	Percentage=71.83%
Secondary (10th Std) Saoner Public School, Saoner	Percentage: 84.80%

CERTIFICATIONS

- | | |
|---|-----------------------|
| • Deloitte Data Analytics Job Simulation | December 2025 |
| • Data Science for Engineer, NPTEL | July - September 2024 |
| • Tata Data Visualization Empowering Business with Effective Insights | April 2026 |

SOFT SKILLS

Problem Solving | Analytical Thinking | Teamwork | Communication | Time Management
